

I am seeking graduate students (MS or PhD) to join my lab in August 2018. The current foci in the laboratory are 1. understanding biodiversity in a number of freshwater systems using multi-marker metabarcoding 2. systematics of freshwater red algae using data from organellar genomes. I am happy to discuss these foci further with interested candidates.

More information about my lab - <https://www.ohio.edu/cas/plantbio/contact/profiles.cfm?profile=vis-chia>

More information about my department - <https://www.ohio.edu/cas/plantbio/>

More information about our graduate program - <https://www.ohio.edu/cas/plantbio/grad/index.cfm>

Please email me if you are interested.

Cheers,

Morgan
