

Diatom specialist (M/F)

Maxéville (54) or Bordeaux (33) – Permanent contract

Offer n : 726

12.12.2016

As part of its development, the laboratory Eurofins Expertises Environnementales specialized in sampling and analyses of water need an experienced diatom specialist.

Attached to the head of department you will have task as following:

- Hydrobiological sampling and analyses
- Preparation of sampling work,
- Processing and determination of diatom samples,
- Writing of technical reports,
- Presentation of results to the customer,
- Application of other standardized protocols (IBGN, IBG-DCE, IPR),
- Active participation in the laboratory quality process.

PROFILE

Specialized training in environment and aquatic environments (Bachelor degree min.), you have acquired skills in biological sampling methods in aquatic environment and in the taxonomy of the diatoms. A skill in phytoplankton taxonomy would also be appreciated.

You ideally justify a minimum of 3 year experience in a research institute, public laboratory or private company in this field.

This position requires rigor, good autonomy, strong organizational capacity and affinity for teamwork.

Position based in Maxéville (54) or in Bordeaux (33) from early June 2017
