

1st - 18th July

Taxonomy of Marine Flora (6 ECTS)

Every summer the Roscoff Biological Station proposes an intensive **phycology and botany course with emphasis on hands-on approaches**. Fields trips to a wide diversity of habitats with spectacular diversity of species are organized and collected species are observed in vivo with light microscopy. Laboratory practical session and lectures promote the use of essential literature and new on-line tools. The course involves students and teachers from all over Europe and is part of the University Pierre et Marie Curie masters program.
