

June 24-26, 2015
Gdańsk, Poland

Summer school on chemoprevention

Development of interdisciplinary Doctoral Studies at Gdansk University of Technology in the area of novel technologies supported by European Union within European Social Fund

Dear Colleagues,

The Organizing Committee of the conference: “Frontiers in Cancer Prevention: fulfilled promises, translational challenges and future directions” decided that young generation of scientists are the most appropriate audience to become acquainted with the history and promises of this research field. These are young researchers whose enthusiasm based on knowledge will give momentum to cancer chemoprevention research to bring developments that will protect society from becoming cancer patients.

With the young scientists in mind, the state-of-art of cancer prophylaxis will be introduced in the framework of the **Summer School on Chemoprevention**. This satellite event will be moderated by researchers who have laid the ground for the development of cancer chemoprevention field.

The participation in the Summer School is free for all participants of the “Frontiers in Cancer Prevention” conference who will fill in the appropriate section in the registration form. It is also free for beneficiaries of the InterPhD Project who will have the opportunity of presenting their research during this event. The Summer School on Chemoprevention will start in the morning on 24th June 2015 as a pre-conference event.

We look forward to meeting you in Gdańsk!

Scientific Committee and Organizers

Please, spread the information about the Conference among your colleagues who might be interested in the participation (<http://cancerprevention.edu.pl/>).
