Guidelines for completing the Training Project

To access the TSP platform, refer to the information and to the manual "TSP Guide for Students" available on the traineeship page of the DiSVA website (https://www.disva.univpm.it/content/tirocinio-formativo).

https://www.disva.univpm.it/sites/default/files/disva/tirocinio/Guida_TSP_2.0_-studenti.pdf

Although the Training Project is filled in by the host organisation, it is important that the student first agrees with the host on the objectives and activities to be included.

In particular, objectives and activities must be:

- consistent with the student's course of study;
- described clearly and in as much detail as possible.

For example, under the activities carried out, do not simply write "Laboratory activities", but state the type of analyses or methods that the student will have the opportunity to see during the traineeship.

The approval of the Training Project takes into account how clearly the sections on objectives and activities have been completed, as well as their consistency with the chosen course of study.
