UNIVERSITÀ POLITECNICA DELLE MARCHE

Dipartimento
di Scienze
della Vita
e dell'Ambiente
DISVA

# TEST PROCEDURE

The knowledge test is strictly personal and must be taken individually by the student in order to assess the level of knowledge of the subjects and of the English language.

**The test is administered on-line via two separate platforms:**

- registration for the **subject knowledge test** is available at the following link: https://nia-dotnet.univpm.it/disva/ofa2021

- registration for the **English language proficiency test** is available at following link: https://nia-dotnet.univpm.it/disva/ofaescpeng/

A valid identity document with tax code must be attached to the application form. **Registration must be repeated for each of the two platforms**. By confirming the registration, the student will receive an e-mail with username and password to access the test for each of the two platforms.

The student may only take the test once during the period in which the test session is open.
Before confirming the closing of the test, the student may review all questions and change all answers as desired.

If the test result is not positive, the student **can log in again with the same username and password** at the next session. The dates on which the tests will be held can be found at the following link:
